

The Peter Schick Foundation is looking to partner with Pharmaceutical Companies in their granting and Charity Donations

Since our FDA approval for studying Type 2 Diabetes, and our PRE-IND # application approval by the FDA, and the pending final approval for our HIV+patients being treated with Blue green algae, we have sought to partner with the PhARMS for both Type 2 Diabetes and HIV/AIDS treatments. We feel that we are a natural partner for these companies, because Blue green algae is not toxic compared to many of these companies products, might prevent side effects of the treatment of these 2 states, and has a real chance of changing the course of both these horrible diseases, both in terms of morbidity to the patients, costs to medical providers, patients, families of patients, all of which are in the best interest of both organizations, the Pharma companies, and our Foundation.

We believe without question, that we are on the forefront, the cutting edge of treatment of both of these disease states. Both thru our foundation, which will do the clinical trials and report the results, and thru our new for profit company, an LLC, we are on the brink of having a very prosperous biotech company. Since linking and partnership are the basis of all bench mark research and clinical trials, we invite you as individuals, groups, and organizations, to partner with the Peter Schick Foundation. We are not soliciting donations, but of course we wouldn't refuse them.

But we are more interested in forming a health care consortium to deal with these horrible diseases. Whether it is by volunteerism, or by personal experience, share with us your stories, your problems, and although we might not be able to solve them, we will certainly listen. Do not hesitate to call us at 1-310-394-7989 or email us at schickpm@aol.com. Join the fight as we are doing, to right the wrongs of individuals affected with these horrible diseases, and let our organization give comfort to all of the people out there who seek it.

Have a great Spring

Peter Schick
Chairman of the Board of the Peter Schick Foundation
